2	I feel practicals should have been more frequent but not held so heavy on pass/fail. The "real world" experience was very helpful but weekly as a skill check would be best. I feel our sympathetic nervous system would be less activated. Practicing "real world" situation more frequently with the pressure of quick thinking will prepare the students.	10/1/2018 3:49 PM

1	It may be beneficial to include more of the billing aspect and how the different units apply for different insurance companies during the last semester.	10/1/2018 9:47 PM
2	I am very satisfied with the program. Great instructors.	10/1/2018 5:26 PM
3	I loved the you tube videos in PHYR 264. Not only am I a visual learner but having access to the lecture for review and reflection was so helpful. It would also be amazing if we could have access to the lectures on the student tracker indefinitely or a thumbdrive of it. The lectures were taken off before I had the time to put on a thumbdrive. Their power points are like gold. Maybe they could be sold at the end of the year as a fundraiser for future scholarships.	10/1/2018 3:54 PM
4	Great program all over. I only wish there was more education on advanced training or physical therapy specifically for athletes. And more time spent in the gym and learning about lifting weights with proper form.	9/12/2018 1:33 PM
5	This a great program! I continue to be able to reach out to past professors with any questions, concerns, and/or advice.	9/12/2018 9:48 AM
6	I loved both years as a student and everyone became a family, students and faculty	9/12/2018 9:17 AM
