

# BECOME AN MT2C CLASSROOM TUTOR!

## FALL 2018

**CURRENT SUBJECTS:** Accounting, Anthropology, Astronomy, Biology, Chemistry, Geography, Geology, Math, Physics, and Psychology (and possibly more!)

### What is an MT2C Classroom Tutor (CT)?

CTs are assigned to classes with statistically high success and retention gaps among students. CTs attend each class session of their assigned course, during which they identify concepts and topics that students are having difficulty with. Immediately before or after class, the CT leads a CT session (tutoring session). These sessions utilize equitable tutoring practices, peer interaction, and guided study so students collaborate with one another to improve success and retention.

## DETAILS AND QUALIFICATIONS

- ❖ Make a difference with historically underserved and underrepresented students here at Mesa
- ❖ Reinforce your knowledge of course content and establish professional connections
- ❖ Work 6-10 hours a week for the semester
