

Cohort #1 (2015-2016)

Photo	Science Connection	Recent High School / College
	Alex Bahena wants to major in Biology or Biochemistry. He has always had a strong passion for science.	Madison HS
	Eliuth Garcia wants to earn an Associate's Degree in Business Administration. She is interested in science because she believes it is fascinating to see how it addresses life's mysteries.	Madison HS
	Alec Alba wants to major in Computer Engineering. He is interested in science because he is amazed by the countless number of new discoveries made every day.	Madison HS
	Mariana Castillo wants to major in Physical Therapy. Ever since she was little she has been interested in science.	Madison HS

Cohort #1 (2015-2016)

	Cesar Rodriguez wants to major in a field of science. He is interested in science because he believes that it is the key to all human knowledge today.	Madison HS
	Angel Montanez wants to major in Biology. He is interested in science because ever since he was a child he was always fascinated with the world around him.	Madison HS
	Stephanie Torres wants to major in Math or Engineering. She is interested in science because she believes it answers the questions of why things happen.	Mission Bay HS
	Danny Samaniego wants to major in Geographic Systems. He is interested in science and its integration with technology and curriculum.	Kearny HS

Cohort #1 (2015-2016)

	Joanna Rodriguez Parra wants to major in Biology or Environmental Science. She is interested in science because she loves how it holds many answers to lingering questions, and how it means something different to every individual.	Kearny HS
	Andrew Munoz wants to major in Economics or Business. He is interested in science because he wants to explore the intersection of business and scientific inquiry.	Clairemont HS
	Cristian Sandoval wants to major in Computer Science or Mechanical Engineering. He is interested in science because he believes that it can help us better understand our universe, and it opens the door to many possibilities.	Mesa College
	Joe Avalos wants to get an Associate's Degree in Chemistry. He is interested in science because it allows us to better understand the phenomena of our universe.	Mesa College

Cohort #1 (2015-2016)

	Katherine Sabo wants to major in Nutrition or Biochemistry. She is interested in science because she loves learning about how the body works, and how different anatomical systems work together and affect each other.	Mesa College
	Khalid Taha wants to major in Chemistry. Ever since he was a kid he fell in love with science.	Mesa College
	Mara Rosza wants to pursue a certificate in Geographic Information Systems. She is interested in science because it serves as a beacon that shines a light on many of our largest civic problems and questions.	Mesa College
	Nate Tauzer wants to major in Psychology Conservation. Since childhood, he has always been interested in science.	Mesa College

Cohort #1 (2015-2016)

	Jessica Vallejo wants to major in Nutrition or Psychology. She is interested in science because she wants to learn about the health issues that impact Americans.	Mesa College
	Julia Julima wants to major in Biochemistry. She is interested in science because it means that there is a reason and a cause for everything and that nothing is coincidental.	Mesa College
	Shelby Basinger wants to major in Biology or Biochemistry. She is interested in science and its connections with forensics and human biology.	Madison HS
	Aaron Cleary wants to major in Engineering. He is interested in learning about science because it allows him to develop a greater understanding for why and how parts of the world work today.	Madison HS
