SD Mesa SEEDS Scholars Program

SEEDS MESA present at the Clairemont Day at the Bay Event

April 4, 2015

It was a great day for the Mesa SEEDS Ambassadors to interact with young students from our community at this event. To our surprise a few students in attendance were still in middle school. How great is it that these young students admire and are already interested to be part of the SEEDS Scholars Program? Clairemont Day at the Bay was an amazing opportunity for us to see the real interest that our community has for the kinds of issues we are advocating for in the SEEDS Program. We were able to connect with people and in overall, improve the public knowledge of our incoming Program.

Chilly yet amazing Earth Day event

April 22, 2015

Ah it's that time of year to promote awareness of the environmental issues that are occurring on Earth. Here are a few snapshots of some students who take conservation and environmental sustainability to heart. There were many students who were interested in knowing what role SEEDS is going to take in addressing issues of environmental sustainability, food security, and hunger. We invited Earth Day participants to join us in our efforts to make positive changes. To encourage critical and creative thinking, students wrote short poems on the SEEDS themes.

The **“SEEDS” Scholars Program** (STEM Engagement for the Enrichment of Diverse Students) is designed to increase the number of Hispanic students pursuing future graduate degrees by providing a firm foundation of advanced knowledge and skills in STEM-related fields (science, technology, engineering, math), beginning in the first two years of college.
