

SAN DIEGO MESA COLLEGE

Equity, Excellence, Éxito

Biology Peer Mentor Natalie Trujillo

Hello, my name is Natalie Trujillo, I'm a student here at Mesa College getting my associates for transfer in Biology, and I'm hoping to transfer to San Diego State University next fall to get a bachelors in Biology with an emphasis on ecology.

When I'm not studying, I love watching Formula 1, Spending time working in my garden, Crocheting, or playing video games (my favorites right now being Baldur's Gate 3 and Stardew Valley).

A fun fact about me is that I have two African Dwarf frogs, Lieutenant and Baby.

I'm super passionate about Biology and the different workings of our environments so I can't wait to share that passion and what I've learned in BIO 210B with all of you! Thank you! "
