Summary and Reflections with Unit Goals, Action Plans, and Updates

Academic and Learning Support - STEM Programs

Executive Summary

Describe the successes and challenges your unit has faced since the last comprehensive review.

One of the major successes we achieved was the acquisition of a Title III HSI grant. This grant not only provided us with additional funding but also validated the value and impact of our STEM program within the community. The grant allowed us to invest in advanced equipment for classrooms, new technology resources, and faculty development opportunities, ultimately enhancing the quality of education and research in STEM disciplines. Another significant success has been the expansion of our peer mentoring services into new disciplines. Recognizing the importance of peer support in student success, we broadened our mentoring program beyond its initial focus on specific STEM fields. By incorporating new disciplines such as physics for life science majors (Physics 180 sequence), organic chemistry, and engineering we have created a more comprehensive support system for students pursuing diverse STEM pathways. This expansion has fostered a stronger sense of community among students, increased retention rates, and improved academic outcomes. Furthermore, we successfully expanded the physical space of our STEM center. With the growing demand for STEM education, the previous facility was no longer sufficient to accommodate our expanding student population and program offerings. Through careful planning, collaboration with campus stakeholders, and securing additional funding through Title III and Title V funds, we were able to renovate and expand the STEM center to incorporate LRC 116 in addition to LRC115. The new facility now features state-of-the-art computers, models and kits, collaborative study spaces, and dedicated areas for, STEM counseling, tutoring and peer mentoring.

If applicable, describe any major curricular or service changes your unit has engaged in and the impact of those changes since the last comprehensive review.

Since the last comprehensive review, our unit has undertaken significant curricular redesign in the areas of chemistry, mathematics, and physics, thanks to the support of our new Title III grant. These changes have had a transformative impact on our program, enhancing the learning experience for students and improving their academic outcomes.

With the grant's assistance, we were able to engage in a comprehensive redesign of the curriculum in chemistry, mathematics, and physics. This redesign aimed to modernize and align the content with our four-year partners and emerging trends in STEM fields. Previously, STEM disciplines were often taught as separate entities in their own "silos." However, the redesigned curriculum encourages students to recognize the interconnectedness of these fields and apply knowledge from one discipline to another. This integrated approach nurtures a holistic understanding of STEM subjects and prepared students for the interdisciplinary nature of modern scientific research and problem-solving.

If applicable, describe the impact of any new resources (human, fiscal, etc) on the unit and/or action plan implementation.

Our new grant's funding has been instrumental in our efforts to redesign our STEM classrooms into smart interactive high-tech learning environments, specifically designed to enhance modern science education. One of the primary impacts of these new resources is the transformation of our STEM classrooms into state-of-the-art, smart interactive spaces. The grant funding has allowed us to invest in cutting-edge technology, including interactive whiteboards, multimedia displays, modular furniture, and specialized software applications. These resources will enhance the learning experience for our students, providing them with immersive and engaging opportunities to explore scientific concepts through hands-on activities, collaborative group work, simulations, and virtual experiments. The interactive nature of the technology encourages active participation, collaboration, and critical thinking among students. By the end of the grant we will have introduced at least four new modern classrooms to our Mathematics & Natural Sciences building.

Data Reflection

Trends observed in program/service area's data.

We have seen a huge increase in the engagement of students with our various programs including peer mentoring, Path to STEM Success events, and the STEM Center.

Peer Mentoring Attendance numbers:

Fall 2021 - 117 unique students with 873 occurrences

Spring 2022 - 211 unique students with 1,683 occurrences

Fall 2022 - 524 unique students with 3,436 occurrences

Spring 2023 - 700 unique students with 3,287 occurrences

Note: Fall 2022 and Spring 2023 have not been disaggregated yet.

We also see an increase in enrollment in the classes that are supported by the various activities of the grant.

STEM Center attendance continues to grow both in-person and virtually. In particular, we observed over 18,000 contact hours with students inside the STEM Center in Spring 2023. Typical utilization involved 250-300 contact hours by students - while some peak days exceeded 500 with over 80 students simultaneously taking advantage of services.

Describe any equity gaps in the data. Are there differences and/or patterns observed by demographics (e.g. race/ethnicity, gender, age, etc.)

Equity gaps exist in enrollment of our STEM courses among Latine students. As this is an HSI grant, this is the group we are required to focus on.

Further, although peer mentoring attendance has increased overall, Latine head count only accounts for 34% of the headcount, even though the campus is 39% Latine.

Describe the discussion(s) that took place about the unit's learning outcomes assessment data.

The new grant has biweekly meetings with all members of the team including faculty, classified professionals, supervisors, and administration. Data conversations occur regularly at these meetings. The APR is disseminated among team members as well as the campus Executive team. Biannual evaluations with an external evaluator include all team members and campus Executive team. Also, the faculty lead, program director, STEM Center supervisor and research analyst have biweekly meetings to discuss outcomes and further data collection needs.

Summary and Reflection

Practice Reflection

Describe current practices your program/service area has engaged in that you believe impact the above data trends and equity gaps.

Bringing services back to campus as well as the course sections that we serve has been the central factor to increase in engagement. Further, each semester we increase the number of peer mentors that we employ and we have extended the course list that are served. Further, keeping virtual services open as well helps to serve those students that cannot make it to campus for whatever reason. We do see equity gaps among our Latine community, however, the objectives of the grant are being met.

What other factors (internal or external) might also impact the above data trends and equity gaps?

The only objectives not met in the first year of the new grant were all based on enrollment. Even though our objectives are based on the Hispanic and Latine community, the overall enrollments of the campus have been trending down, even before the pandemic. Over the past year we have started to see an incline. We will need to watch numbers closely to see if our objectives are trending in the same direction the campus is.

Mid-Cycle Updates

Are there any edits or updates to the Executive Summary above?

N/A

Are there any edits or updates to the Data Reflection above?

We have entered our Year 2 APR data to be reported to the Department of Education. We are still falling behind on some metrics, but are improving from Year 1. It is tough with the baseline year being 2019, pre-pandemic, as we continue to recover and grow post-Covid.

Are there any edits or updates to the Practice Reflection above?

Summary and Reflection

Expand the STEM Center Space and Capacity

Unit Goal: Expand the STEM Center space and capacity in order to meet the increasing needs and demands of students.

Goal Status: Active

Beginning Year: 2022 - 2023

Projected Completion Year: 2025 - 2026

Mapping

Mesa College Strategic Plan: Roadmap to Mesa2030: (X - Highlight the X to Align)

- Completion - Objective 4: X
- Stewardship - Objective 4: X

Action Plans	Action Plan Update
<p>Action Plan Status: Active</p> <p>Action Plan: 1. Purchase laptops, calculators, software, and other STEM supplies needed for inside and outside the classroom.</p> <p>2. Follow usage data carefully and identify tables, chairs, and other spatial needs for student use.</p> <p>3. Work with LRC team to identify needs of students and how the STEM Center can contribute to those needs.</p> <p>Action Plan Cycle: 2022 - 2023, 2023 - 2024, 2024 - 2025, 2025 - 2026</p>	<p>Submission Date: 12/11/2023</p> <p>Action Plan Update: Usage in the STEM Center has increased significantly during the Fall 2023 semester and we expect even more students in the Spring. Other than purchasing regular supplies, such as markers, the Title III grant has purchased 9 more tables with wheels for student use in this area. The new tables allows us to use all of the chairs that were purchased two years ago in anticipation of this increase in usage. We have also purchased more calculators for student use and moved the computers from the middle of the room, to against the wall to create more floor space.</p> <p>Update Year: 2023 - 2024</p> <p>Action Plan Progress: On Track</p>

Improve and expand STEM tutoring and mentoring services.

Unit Goal: Improve and expand STEM tutoring and mentoring services.

Goal Status: Active

Beginning Year: 2022 - 2023

Projected Completion Year: 2025 - 2026

Action Plans	Action Plan Update
<p>Action Plan Status: Active</p> <p>Action Plan: 1. Support STEM faculty with various professional learning opportunities offered on campus including MOST, FIGs, CEER, and others.</p> <p>2. Bring ESCALA to campus to offer STEM focused professional learning.</p> <p>Action Plan Cycle: 2022 - 2023, 2023 - 2024, 2024 - 2025, 2025 - 2026</p>	<p>Submission Date: 12/11/2023</p> <p>Action Plan Update: In the past year, we have had 11 more employees engage in professional learning. We are working on getting more faculty to engage with FIGs, as well as provide professional learning opportunities for classified professionals, students, and administrators. We are currently in talks with ESCALA on two programs. One of the programs will train employees on our campus to be facilitators of professional development themselves. This will help to increase the number of participants as the expertise will be on our campus. Travel costs, compensation, and people's time have proven to be minor barriers to increasing these numbers.</p> <p>Update Year: 2023 - 2024</p> <p>Action Plan Progress: Barriers Encountered</p>
