

## Program Mapping: Points to Consider

- 1.) The first semester, select one major preparation course.
- 2.) Select a minimum of 3 program courses in the first year.
- 3.) Ensure correct math courses are included in the map.
- 4.) In the first year, include a transfer level math course.
- 5.) In the first year, include a transfer level English course.
- 6.) Recommend GE courses based on your PLOs.
- 7.) Include academic and student support milestones.
- 8.) For high unit majors, maps may extend beyond 2 years
- 9.) Consider using Summer semester when appropriate

## Academic & Support Milestones

What resources should students tap into for improved success and retention in the program?

Financial aid

Counseling

Work-based learning

Transfer center

Tutoring

Clubs

Equity programs

Food & housing insecurities

Learning Communities

Others

Consider when you would recommend students tap into these resources?
