BIOL 210A Peer Mentor Angel Cortez

Hi everyone!

My name is Angel Cortez and I am excited to be a BIO 210A Peer Mentor for the 2023-2024 school year! My goal is to transfer to a four-year university with an Environmental Science or Ecology program - ideally, UCSD's Environmental Systems.

I have tutored, mentored, and taught peers, youth, and community members in various jobs for the past 8 years. I currently teach K-8 science through the Fleet Science Center, but am glad for the opportunity to help you all with college level topics!

Outside of work and academics, I love reading sci-fi & fantasy novels, playing with my cat Ernesto (Che for short), and running a D&D campaign with my friends."

Thanks,
Angel Antonio Cortez
