## **Biology Peer Mentor Aniela Anuszczyk**

---

Hello! My name is Aniela Anuszczyk and I am the peer mentor for bio 210B. I have been attending Mesa College for two years and am hoping to transfer into the marine biology program at UCSD in fall of 2023.

I am the president of the Women In STEM club here at Mesa. My goal once I transfer is to complete my bachelors, and work in marine biology conservation. I am super passionate about helping others and encouraging students to form healthy study habits while succeeding in bio210B.

One of my all-time favorite things is being outside. I love hiking and exploring tide pools. My best tide pool I find so far is Aplusia californica, Sea Hare. I moved to San Diego in August of 2021, and I work part time at Trader Joe's.
