CHEM200 Peer Mentor
Samantha Rone

srone@sdccd.edu

Hi! My name is Samantha Rone, and I am a chemistry peer mentor here at Mesa College. I am currently a general biology major. My goal is to receive a Ph.D. in genetics and become a biology professor.

I am also working as an embedded tutor through the MT2C program. I've been working for the MT2C program for 2 years now. I enjoy helping students find their confidence and I encourage students to build a foundation for themselves as they continue their educational journey in STEM.

I was born and raised in California. Some of my hobbies include listening to music, working out, dancing, painting/drawing, and watching movies. I also enjoy going to concerts, amusement parks, and camping trips with my family. I cannot wait to meet you and let's work together to enhance your learning experience.
