Math Peer Mentor Stefan Wendel

Hello, my name is Stefan, and I am currently focusing on math here at Mesa. I am mainly pursuing education for my own fulfillment and enjoyment, and after completing Differential Equations and Discrete Math this spring, I will begin taking upper division courses through Open University at SDSU.

I have deeply enjoyed my studies at Mesa and have come to realize that I would love to return as a math professor after obtaining a master's degree in the future.

Outside of the academic world I am a professional harpist and I teach Tai Chi. I am so grateful that life is full of endless fascinations and possibilities, and I hope that as a Peer Mentor, I will be able to encourage others to see math through this lens and feel the joy of developing insight and mastery.
