

Workgroup Report

Data Coach Training Program:

Activities In Progress

Kick-Off Meeting Launched on 9/8/22

- 9 participants from including faculty and classified staff from across campus
- Meetings schedules from 9/8 thru 11/28 guiding participants to work on mini-data projects they will present at the end of the course

Activities Completed

- Canvas shell completed with asynchronous training materials, presentations, and homework assignments.
- Successfully worked out a process for classified professionals to be compensated for 9 hours of overtime. This equates to the time spent completing the Canvas activities outside of normal work hours.

Activities Planned

- Bi-weekly meeting will continue with the planning team to determine phase 2 of this project. We anticipate creating a second level of instruction to allow for a deeper dive into the role of data coach.
- We are in the beginning stages of thinking about how to role the data coaches out to the larger campus, hopefully in Fall 2023.
- We will meet with Dr. Al Solano to learn what other campuses have done regarding data coaches. Of particular concern is the compensation piece as we work toward institutionalization of the program.
