

Technology Workgroup Report

Project #1: Website Redesign

- The Communications Office is reviewing the ACP descriptions discussed at MPC and developing icons for the ACP's. They are reviewing the descriptions for consistency and SEO.
- They are also collecting videos and images to create splash pages/promos for the ACP's on the website.
- Draft versions of these items should be available for review at the second MPC meeting in April.
- Outstanding Questions/Needs to be addressed by MPC moving forward:
 - Need to ensure that all programs are sorted into an ACP.
 - Need to develop a process for updating ACP's.
 - Need to identify resources for the "Exploring" ACP:
 - Need to finalize name, no one is a fan of "Undecided."
 - Transfer and Non-Transfer GE Maps
 - Career/Interest Counseling Resources
 - Other?

Project/Activity #2: Program Maps

- Maps that have been reviewed by Counseling are being converted into an editable format for display on website.
- MPC will need to determine who has authority to update maps. The individuals identified will be given permission by Communications Office to edit and update maps.
- Going forward, additional decision about the format of the maps will need to be made, but this will take a great deal of work and input from the broader campus community and will be the focus for the Workgroup in Fall 22.

Project/Activity #3: Technology Needs Survey

- No update
