

Technology Workgroup Report

Project #1: Program Maps

- Maps have been transferred to Google docs format.
- The group discussed the best method for linking to maps from Program Pages.
- Based on this discussion the group thinks each Program Page should link to a centralized page where students can search for and access maps (e.g. the UCSD model).
- If a map is unavailable, it is important to provide students a message with the information they need to contact a counselor to get an updated map. Should also make clear that these are sample maps and that students should see a counselor to develop an ed plan.

Project #2: ACP Descriptions on the Website

- Still awaiting final feedback on descriptions from Faculty and Students in the next few weeks. These can be modified going forward, so these are no means set in stone.
- One important thing to note is that the catalog description of a program may not match what students look for (students don't look for "fermentation," they look for "brewing beer")
- Goal is to present a choice of several icons for final approval. A draft presentation is tentatively scheduled for the 5-11 MPC meeting.
- Should be able to make a final decision by the 5-25 MPC meeting.
