

Program Assessment Worksheet

Program: Hula Hoop Engineering Date: May 22, 2016

Course Number	Learning Outcome covered	LO-Related Assessment	LO-Related Learning Activities	Relevance, Validity, Reliability, Objectivity
100	Identify the tools and techniques used in engineering hula hoop systems.	Demonstrate use of the measurement and weight tools introduced in class. Build a mock hula hoop using the techniques as introduced.	Small group project in which students create a mockup of a hula hoop using appropriate measurement tools.	Hands on application of principles. Application of measurement tools and theories as taught in the course. Mock up project allows real life application. Group work provides collaborative experience.
